

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A gaming system comprising:

(A) a plurality of separate networked roulette game sources located at respective locations remote from one another, each said game source being configured to transmit at least one game, at least one said roulette game source comprising a live game source comprising a game being played on at least one physical roulette game, each said game having a game outcome;

(B) a plurality of gaming devices, each said gaming device comprising: (a) a player input device allowing a player to place a wager on at least one of the games, each said wager being made in accordance with a player-specified scheme including a bet amount and a bet type; (b) a player display allowing a plurality of games to be simultaneously presented to the player;

(C) a user interface in communication with each said gaming device and configured to transmit data to each said gaming device;

(D) a table management system in communication with the user interface, the table management system storing data received from the user interface;

(E) a ball reader proximate to the physical game table and transmitting game data to a first video processor;

(F) the first video processor in communication with the live game source, the user interface, and the ball reader, the first video processor receiving data from the live game source,

the first video processor being configured to compress the live game source data and to transmit the compressed live game source data;

(G) a video server in communication with the plurality of game sources and configured to combine data from the plurality of game sources into a single data stream;

(H) a second video processor in communication with the video server, receiving the compressed data from the video server, decompressing the compressed data, and transmitting the decompressed data to the player display; wherein the player may place a wager on the at least one game and wherein the player may play the plurality of games at a single time; and

(I) a progressive jackpot controller, the progressive jackpot controller in communication with each gaming device, the progressive jackpot controller configured to receive a progressive contribution from any of the plurality of gaming devices and award a progressive jackpot to one of the plurality of gaming devices upon the occurrence of a randomly occurring event wherein the progressive jackpot winning event is dependent on the game outcome of at least two of the plurality of game sources.

2. (Original) The gaming system of claim 1 wherein the player input device comprises a touch screen.

3. (Cancelled)

4. (Cancelled)

5. (Previously Presented) The gaming system of claim 1 further comprising a machine interface card in communication with the gaming device and the progressive jackpot controller, the machine interface card transmitting progressive wager data to the second video processor.

6. (Original) The gaming system of claim 1 further comprising a video recording device, the video recording device recording the live game source and transmitting the recording to the first video processor.

7. (Original) The gaming system of claim 1 wherein the video recording device comprises a video camera.

8. (Currently Amended) A gaming device comprising:

(A) a connection to a plurality of separate remote networked game sources located at respective locations remote from one another, each said game source being configured to capture and transmit at least one game being played on at least one physical game table; and

(B) at least one player interface in communication with the plurality of networked game sources, the player interface comprising a display device and an input device, the player interface being ~~adapted~~ configured to receive the at least one game from each of the plurality of networked game sources, display the at least one game from each of the plurality of networked game sources to a player, and allow the player to play a plurality of games of the at least one game from each of the plurality of networked game sources;

wherein the player may place a wager on each of the plurality of games and make a progressive contribution to be added to a progressive jackpot, each said wager being made in accordance with a player-specified scheme including a bet amount and a bet type, and

wherein the player may play the plurality of games at a single time, the player interface further being ~~adapted~~ configured to provide the progressive jackpot to the player based on the outcome of the plurality of games.

9. (Original) The gaming device of claim 8, wherein each game source comprises at least one video camera, the video camera being configured to capture images of a live game.

10. (Original) The gaming device of claim 8, wherein each game source comprises recorded games stored in a server, and the gaming device further comprises at least one video processor, the video processor being configured to provide playback of the recorded games.

11. (Original) The gaming device of claim 8, wherein player is allowed to apply one set of wagers to a plurality of games.

12. (Original) The gaming device of claim 8, further comprising:

(A) an interface card in communication with the display device, the interface card being configured to detect progressive bet and progressive winning; and

(B) a controller in communication with interface card, the controller being configured to credit progressive contributions and determine progressive amount.

13. (Original) The gaming device of claim 12, wherein the prize for progressive bet is a progressive jackpot prize.

14. (Original) The gaming device of claim 12, wherein the prize for progressive bet is a random jackpot prize.

15. (Original) The gaming device of claim 12, wherein the prize for progressive bet is a pre-determined jackpot prize.

16. (Original) The gaming device of claim 8, wherein the game source and the display device are connected using wireless communications.

17. (Original) The gaming device of claim 8, wherein the player interface is configured to provide gaming instructions to the player.

18. (Original) The gaming device of claim 8, wherein the game source provides games from a group consisting of roulette, craps, blackjack, poker, keno, pai gow, baccarat, and bingo.

19. (Original) The gaming device of claim 8, wherein the game source provides at least one type of table game.

20. (Currently Amended) A method for playing ~~roulette~~ a roulette-like game, the method comprising:

(A) providing at least one game source, the at least one game source being ~~adapted~~  
configured to provide a plurality of separate remote roulette games to a player;

(B) providing a roulette wagering field, the roulette wagering field being ~~adapted~~  
configured to present the player available wagering schemes, the roulette wagering field being  
usable for playing the plurality of roulette games;

(C) providing an input device, the input device being ~~adapted~~ configured to allow the  
player to enter wager information;

(D) allowing the player to select a plurality of roulette games to play;

(E) allowing the player to create at least one set of wagers including a progressive jackpot  
contribution, each said wager being made in accordance with a player-specified scheme  
including a bet amount and a bet type;

(F) allowing the player to play the plurality of roulette games with the set of wagers at a  
single time, and

(G) providing the player a progressive jackpot prize based on the outcome of at least two  
of the plurality of roulette games played.

21. (Original) The method of claim 20, further comprising allowing the player to apply  
the at least one set of wagers to the plurality of roulette games.

22. (Original) The method of claim 20, further comprising providing gaming lessons to  
the player.

23. (Original) The method of claim 20, further comprising allowing the player to place at least one specialty bet, the specialty bet being based upon probability of events happening across multiple games.

24. (Original) The method of claim 20, further comprising allowing the player to place a progressive bet.

25. (Original) The method of claim 20, further comprising allowing the player to apply varying sets of wagers to the plurality of games.

26. (Original) The method of claim 20, further comprising (A) allowing the player to place a progressive bet; and (B) determining a progressive game outcome based on outcomes from the plurality of games.

27. (Previously Presented) The method of claim 26, wherein a prize for winning the progressive game is a progressive amount.

28. (Previously Presented) The method of claim 26, wherein a prize for winning the progressive game is a randomly determined amount.

29. (Previously Presented) The method of claim 26, wherein a prize for winning the progressive game is a pre-determined amount.

30. (Currently Amended) A method for playing multiple games simultaneously, the method comprising:

(A) providing at least one game source, the at least one game source being adapted to provide a plurality of separate remote games to a player;

(B) providing an input device, the input device being ~~adapted~~ configured to allow the player to enter wager information including a progressive contribution to a progressive jackpot payable to one of the player and a plurality of other players;

(C) allowing the player to select a plurality of games to play;

(D) allowing the player to place bets on and play the plurality of games at a single time, each said bet being made in accordance with a player-specified scheme including a bet amount and a bet type;

(E) providing the player the progressive jackpot based on the outcome of at least two of the plurality of games played.

31. (Original) The method of claim 30, wherein the games are from a group consisting of roulette, craps, blackjack, poker, keno, pai gow, baccarat, and bingo.

32. (Original) The method of claim 30, wherein the games are table games.

33. (Currently Amended) A gaming ~~device~~ system comprising:

(A) a plurality of capturing devices configured to capture ~~means for capturing~~ a plurality of games being played on a plurality of separate remote physical game tables;

(B) at least one ~~transmitting means~~ transmitter for transmitting the plurality of games to at least one display ~~means~~, the display ~~means~~ displaying the plurality of games to a player; and

(C) ~~a means for an interface for interfacing with~~ the plurality of games to be playable at a single time and in accordance with a player-specific wagering scheme including a bet amount and a bet type, and

(D) ~~communication means~~ a communicator configured to communicate with a plurality of other gaming devices to compete with players at the other gaming devices.

34. (Currently Amended) The gaming ~~device~~ system of claim 33, wherein each of the capturing devices ~~means~~ comprises a plurality of video cameras, the video cameras being configured to capture images of live games.

35. (Cancelled)

36. (Cancelled)

37. (Currently Amended) The gaming ~~device~~ system of claim 33, further comprising an input device ~~means~~ for allowing a player to place a wager.

38. (Currently Amended) The gaming ~~device~~ system of claim 37 wherein the player is allowed to apply one set of wager to the plurality of games.

39. (Currently Amended) The gaming ~~device~~ system of claim 33, further comprising:

(A) an interface card in communication with the at least one display~~means~~, the interface card being configured to detect progressive bets and progressive winnings; and

(B) a controller in communication with the interface card, the controller being configured to credit progressive contributions and determine a progressive prize amount.

40. (Currently Amended) The gaming ~~device~~system of claim 39, wherein the prize for a winning progressive bet is a progressive jackpot prize.

41. (Currently Amended) The gaming ~~device~~system of claim 39, wherein the prize for a winning progressive bet is a random jackpot prize.

42. (Currently Amended) The gaming ~~device~~system of claim 32, wherein the prize for a winning progressive bet is a pre-determined jackpot prize.

43. (Currently Amended) The gaming ~~device~~system of claim 33, wherein the ~~transmitting means~~transmitter and the display ~~device~~ are connected using wireless communications.

44. (Currently Amended) The gaming ~~device~~system of claim 33, wherein the ~~means for interfacing~~interface is configured to provide gaming instructions to the player.

45. (Currently Amended) The gaming ~~device~~-system of claim 33, wherein each of the capturing devices ~~means~~-captures games ~~from~~-selected from a group consisting of roulette, craps, blackjack, poker, keno, pai gow, baccarat, and bingo.

46. (Currently Amended) The gaming ~~device~~-system of claim 33, wherein each of the capturing ~~means~~-devices captures at least one type of table game.
